CAREER OBJECTIVE

I am a committed Full stack developer with experience in JavaScript, HTML5, CSS and Angular with a solid foundation in computer science. I use my back-end expertise with Java Spring Boot and MySQL to build user-centered, responsive Internet applications. I'm passionate about innovative projects and work in teams to create informative notable applications.

SKILLS

Front-end: HTML5, CSS, Bootstrap, JavaScript, Angular

Back-end: Java, Node.js, Java Spring Boot

Databases: MySQL, MongoDB

PROJECTS

- Front-End Projects: To-Do List App: Basic task management app, Quiz App: Interactive quiz with navigation and scoring, Image Filter App: Simple app for filtering images by categories, Newsletter Signup Page: Responsive landing page, Personal Portfolio: Showcases skills and projects with a personalized design using HTML, CSS, JavaScript. Form validation, Implemented form validation using Angular, TypeScript, HTML, CSS.
- The Java Spring Boot project developed a RESTful API for customer data using MySQL and Spring Data JPA, ensuring efficient CRUD operations and leveraging Spring Boot starters for integration.
- Basic Level Project Managed and manipulated insurance data with MySQL queries. Advanced Level Project Created stored procedures and triggers to automate and optimize data operations in the copy_worlddb database.
